ETORO about transferring shares to Computer share

Dear APE,

Thank you for contacting eToro Customer Service.

For our clients, unfortunately we do not facilitate transferring of portfolios from eToro to another platform, we are sorry for the inconvenience caused by this.

Please note that buying real stocks on eToro works on a custodian arrangement. This means that eToro will purchase them on your behalf and hold them in custody for you under eToro's account. Although you are trading the value of the underlying real asset, you are not issued a stock issuance certificate and your name is not registered under the share register.

Should you have any further questions or concerns, feel free to get back to us here or live chat with us during our business hours.

Best Regards,
