Well here i go. First official shitpost/discussion about what and where i stand with GME to this day. Over this last year of holding since march and going through the broker dilemma RH/Fidelity/DRS 100% booked shares and all the DD, SEC hearings, and 3rd party website research done by Youtubers. I've decided that the only way one can feel confident on this trade for GME is that the only way i believe Us Apes will Win is when [RC] issues the NFT dividend through the market place too annihilate the lies and bs that we as retail investors have to endure. You see the pure "EVIL" and connection all these entities have we each other and the lack of righteousness and truth they have is immutable. They don't play by the rules, they hide, sneak, even to go too the extent of using cryptic languages in Option sequences/Buy/sells too communicate just goes to show us Apes what they will do to Win this. The point to what i am saying is that look at the game that they are playing. They think we're are relying on them to "make this happen" and you can already see there blaming us in media and bombarding us with B.S over and over again to try and get us too fall! NFT dividend is the Golden Ape Key to Bananna Rocket moon Landing. Mark my words. I could be wrong and im not a financial advisor but hold strong in this conviction and shares. ■■
