UK ape here and the time has come for me to stop being a bystander and to start DRSing my gme shares. My problem is I'm trying to set up an IBKR account from which I can buy some shares and then send them to■■■■■ and their horrible UI is completely baffling me.

My brain is marble smooth, which doesn't help, but I can't figure out how to deposit money into my account, without walking into a physical bank building. IBKR have given me a sort code and account number (for what seems to be a UK account/bank), but my banking app is saying that it cannot verify the name of the business that I'm trying to send the funds to.

Has anyone else had this problem? And if so, how did you get around this?

I know there are lots of help guides out there for DRSing and for IBKR, but a lot of them are for transferring shares (which I'm not trying to do just now) or they start further along in the process and so don't mention how to fund the account.

Any help with getting my shares into the ■■■■■■ would be hugely appreciated.
