INFINITE SQUEEZE!!!!

How are they delivering when no shares are available?

This has not been debunked. This is not "oh we talked about this already, stop talking about it". It's a 9 month long effort to suppress this information. I'll only listen to Susan Trimbath if she has a counter argument. Other wise stay frosty and fight this shills apes!

<https://preview.redd.it/whipggghto2t71.jpg?width=1087&format=pjpg&auto=webp&s=1c3e1f3fd50e294031501ebebcb7b519803981b3>

FTDs are not being legitimately closed, they're kicking the can down the road as usual.9 month effort to suppress this information. Think for yourselves Apes! We know the counter argument to this relies on 2 paragraphs that describes nothing of the FTD delivering process.

The stated counter FTD report comes from a party who's complicit in committing securities fraud. NSCC, SEC, DTC, DTCC

Why are we using Computer share? To take our shares away from the corrupt parties not acting in good faith

They say I'm circumventing them...but they're circumventing you, the retail individual, to decide for yourself by changing the amount of viewers to my post. Why cant the community decide for itself with votes? Isnt that why reddit exists? to be a publisher wiht no editor? Why all of a sudden do we have editors in the form of mods now?

Would ya look at that? Now they're preventing me from defending my self in the comments

Im going to make this short and sweet, straight to the point. I went on to chart exchange where they have a list of FTDs by date. So a light bulb went off...how far does this history go? to Jan 2014? Cool I'll take all that shit. Im gonna add up some numbers. 45 minutes later, you guys have a solid DD. This is your absolute BARE MINIMUM of shares needing to be delivered upon our NFT Dividend. this alone will cause the infinite squeeze.. not a short squeeze...

INFINITE SQUEEZE!!!!There is a huge effort to keep you guys from realizing this is massive. Notice how they gang post and repeat the same talking point. The FTDs get reset every day. This is a criminal enterprise. They are not legit hedge funds and market makers and broker dealers. They are thieves. They thought someone else was going to be president from 2016-2020. The wife of the president, of during whoms presidency in 1999 ended Glass Steagal Acts from the great depression regulating banks and also the DTCC founding in 1999. Im not wrong. and shills comments will age like milk. They thought they were going to do 2008 again and steal our money through bailouts but someone replaced all the judges in this land so that companies like Overstonk could get a fair ruling against wallstreet naked shorters. I smell RICO cases everywhere coming

Edit 6 idk: Just look at the lifetime graph and tell me when you see the death spiral...2013 until january 2021?! Come on guys... its insulting to me how in our face it is

As you can see there are 86 pages I had to copy and paste over to a word document, which I then saved as a text file. I imported the text into a spreadsheet and autosummed the FTD total.

The result is absolutely astounding. We know without a doubt, they've shorted GME with hundreds of millions or billions of shares since 2013. That number is still in the air but I have a fellow ape crunching the

numbers with me. The data is in limited amounts so the actual physical work of transferring data has to be done manually and we cant just script it. We have a really good idea of what the short volume total number consists of and it's just a matter of time before we get all the data together.

Forget that though. We have the FTDs and those alone shine bright like a diamond now clear as day. They've never closed. Cuban didn't tell us that for no reason "their goal is to never close" because they plan on bankrupting the company to avoid paying any taxes.

The amount of FTDs here is a STAGGERING 3.5 X the public float!!

This will be the shortest DD I've ever written probably. Honestly it only needed to be 3 sentences. I just want to write more because I enjoy the silent fuck you to the hedges

Get your Tits Jacked.

The NFT Dividend is going to rock our socks off Apes!!!

For anyone interest I have saved my text file and my excel files as master files. I can add FTDs daily to my text and to the excel version.

PSA I tell all my friends in the stock market about computer share! I say the more people registering shares market wide is even more of a fuck you to all the criminal naked shorters! IMO Not financial advice

EDIT: PSA #2 lol when you try to shill the author of DD with 6 month old FUD and then I just post that shit in my main post with an edit and screenshot because you tried to mass downvote my reply and hide it from public view you coward. These guys have been FUD the entire time!

Funniest part? It took mere minutes for all of these comments to pop up in a row on my post lmao try harder shills

Edit:

Notice how a new account pops up to continue a conversation with me after I blocked the first commenter for shilling. This is a common thing to me. They really try to suppress anything I have to post about. This tells me Im on the money. It never fails as an indicator. And they never thought I would add screenshots to my post to circumvent their mass downvoting

Aggregate definition doesnt even fit for how the shill tried to use it grammatically "Its aggregate""i think its aggregate"

shut up with this annoying repetitive nonsense

If FTDs didnt matter, RC wouldnt bother with an NFT dividend.. The facts speak for themselves. The shill posts the most vague information. If you all fall for that shit FUD again, youre dumb as rocks. Because theyve successfully suppressed this info on reddit until now. And unless the commenter is Susan Trimbat, dont listen to a word that shill says. The shill can never explain where the FTDs go considering we own the entire float...what shares are they delivering? they never owned any to begin with... stupid ass shills think were naive. Paris Climate Accord didnt have shit to do with the climate

Just look at em panic commenting like citadel on twitter the other week...throwing at technicalities like " we didnt talk to robinhood on jan 28th" cuz they did it on the 27th duh

Shills think theyre so clever and have everything covered when it comes to topics they want to suppress or want to smear the poster.. I came with tricks up my sleeve tho

PSA: I HAVE NOT TRUSTED THIS MOD FOR A LONG TIME. CHECK MY POST HISTORY, LOOK HOW I GOT POPULAR AND THEN HAVE BEEN SUPPRESSED. PAY ATTENTION TO THAT METRIC. SOMEBODY GETS POPULAR AND HAS THEIR OWN VOICE, THEY GET SILENCED. WE STILL HAVE CORRUPT PARTIES INVOLVED IN ALL SUBS.

Ask yourself why everyone saying Im wrong has 900x the comment karma than post karma....because all they do is shill in the comments and mass up doot each others comments....come on guys catch on

#

they dont offer anything in posts. yet theyre experts all of sudden in my comment section...stfu

Remember when all Mods were reputable DD writers? why did that change.... why is u/Atobitt no longer a mod here anymore? because someboy was upset that when he posted, it was pinned?

Austin Tobitt has stuck his neck out for the Apes and put the largest target ever on his back and put in countless hours of research and assembling reports for you...and you guys turn your back on him.

I personally would love to talk to u/Criand please help
