I did a transfer of gme shares from my US Margin account to my US cash account (I plan to DRS more shares) today — and my average book cost was over \$1000.

I'm with TD- Direct Investing.

Does anyone want to try to transfer their shares over to their cash account and see if they encounter the same thing?

I did a screenshot, I called them and I have to fill out a book cost adjustment form. Gotta have to go to the branch and have them fax in the form and my past statements to have them fix it.

The rep says this is very strange and he has never seen anything like this before.
