Lemme tell you something. I am a UK ape who didn't buy the whole DRS "nonsense" at the start when this sub started getting into it. Then as the idea slowly started growing on me my initial plan was to DRS only ten percent of my shares and let everybody else do the rest.

Then I started reading the terms of service of the brokers I was with and I thought "Fuck that shit".

Then I found out that only DRS'ed shares are guaranteed to obtain NFT dividends should Gamestop issue them in future

I have now DRS'ed around 350 shares (although only around 250 are logged with the bot) and there are more coming in the future

I am a UK ape - where DRS process took 60 days per account. And I have 2 other family members on board. If I can do it - you can too.
