Please somebody help me understand. GME For a year we have been pushing between 1 million and 3 million volume per day. I was told that shares were drying up and that was the reason. Even when shares were at 70 dollars a share still 3 million. Where is 9 to 16 million volume coming from. Where was this volume at 70 a share? All of a sudden were hitting 170 and close at 190. With 16 million? Help me understand how?
