Hey Everyone,

****GME is trending**** on Twitter over the last 4hrs. The dashboard looks at tweets, comments, likes, and impressions. See details below on how you can track this information.

****Tracking Mechanics****

* The algorithm pulls data from multiple social platforms. For Twitter, we use the Twitter API. It looks at tweets, comments, likes, and impressions.

* The change in these metrics is displayed as well as the underlying posts that feed the dashboard, so you can drill into the individual tweets for transparency and sentiment purposes.

* There is also tracking for Reddit and Stocktwits - though Twitter usually has the largest reach.

****Trending Overview**** \- Change in Tweets, Comments, Likes, and Impressions.
