I know there will eventually be off-ramp capability to sell ETH directly from your GME wallet for fiat, but in the meantime, what is the best way to sell ETH for fiat? My thought was move from L2 to L1, then transfer to CB or some other CEX, then sell for fiat then transfer to bank account. Not sure if this is the best way or if there is a better way others have been using. Any suggestions would be much appreciated!

BUY. HODL. DRS. GME. SPLIVY INCOMING. MOON SOON.
