**A seven minute and 17
second quarterly earnings
conference call.**

How long are earnings calls?

Expect the call to last between 45 and 60 minutes. Although, there's no requirement for how long the call should be. The Q&A session can be a big factor when it comes to the length of the call, although hosts will generally aim to keep this portion within a time constraint, especially once the priority analysts and investors have been given the opportunity to ask their questions.
