Please provide Links to your Countries/Nations Founding documents and comment if there is anything we should consider for future generations.

In light of current events I want to have a discussion on how to transfer sovereignty peacefully.

As the topics in the discussion might have strong political opinions I wanted to move the discussion to a more appropriate sub. Please Be kind to each other.

I just thought this could be a chance to see what a crowd sourced and democratic constitution would look like. Thank you for your input.
