I know not ALL of us are crayon eaters and some of us apes possess advances degrees, years of expert trade skills and experience, entrepreneurship and maybe even a few lawyers as well as some stock and financial experts. I would like to get a list of letters that others have sent, smartly worded articulate letters, to help me compose the "MOLEF"

Mother Of Letters Explaining Fuckery

After much venting and bitching (that may have been bourbon-induced) yesterday I like some of the comments that said to contact various government and media entities about the latest of shenanigans' to include the trading halt GME just had imposed on it. I honestly think writing to the government entities is a huge waste of time; 1) because they don't give a shit for too many reasons to even try to list here and 2) they are completely complicit and powerless against them.

So, in the spirit of not reinventing the wheel, I wanted to see a couple of samples of the letters that other apes have sent so that I can pick from them what I like and compose my own letter. TBH, GME is my first and only stonk, so I obviously do not have the knowledge and experience to put the fuckery into words that would make sense to an educated lay person. I have a hard enough time trying to explain it to my wife who just nods slowly while I use the "selling the same car to multiple people by copying fake titles example." That example doesn't even begin to explain the dozens of ways the can is kicked or the goal post is allowed to be picked up and moved while the referees jus watch and do nothing.

I have a couple of days stuck at home so I will DMOR on who/where these letters needs to go. I live in a pretty decent sized US city and actually have a few media contacts that, IRL, probably don't give a shit about it and will probably "file 13" it until they start seeing some Wall Street entities going tits-up. Then maybe they will want to look into it more. I actually have a DTCC office in my area, so since that could make it a local story would like to articulate their role in the fuckery process.

Also, while I have some down time, I think I will try and come up with a master list of names and contact numbers/emails of national entities that could be an all-in one directory of places we should be calling and writing. I am not sure if this has been done already and TBH, not a fan of the "other" sub, so if they already have one please let me know. I think I will post this to r/DDintoGME since they seem to always have their shit together and are a wealth of knowledge.
