Hi I'm looking for some help from any Canadapes that have successfully opened a Computershare account and registered GME shares.

I just called Computershare Canada (1-800-564-6253) and was impressed that I got through fairly quickly. I don't have an account and was looking for information on how to open an account (must have an Account Holder Number to do online registration).

The rep was polite but insisted I tell him what security I was interested in purchasing before discussing account creation. I told him Gamestop and asked about whether that was possible being I would register in Canada and they are a US company.

This is where you'll call FUD but he chuckled under his breath and told me to call Computershare US (1-877-373-6374). I asked him to confirm if he was saying it wasn't possible for Canadians to buy Gamestop through Computershare Canada and the line just went quiet. Literally nothing. Mic muted, no response, even though I stayed on for 2 min and kept asking for confirmation. The call clock kept going but I guess I just got ignored?
/rant

All this to say, have any Canadians successfully created an account with Computershare US to buy & register GME? I am calling them next and will report back.
