

Title: Last night Fidelity offered me 17% APR to borrow GME from my IRA ... this is up from their offer of 16.5% last week.

I posted a report in another sub last week: Fidelity had called me out of the blue asking if they could borrow my GME shares. I had a long chat with their rep ... there are substantial risks involved in loaning shares, especially before D-day. (I wrote that all up in the earlier post - see my post history.)

Anyway I plan to HODL!
