

Title: Market Makers control 99% of trades and have almost no cash (relative to the amount of money they move)... they do have receivables from brokers but is most likely other market makers... it looks like the market makers are bout to get caught in a liquidity crunch....

****THE RICO case has never looked more clear in my eyes...****

Some people are defending Susquenhenna's low cash positions - let me tell you something... \$6,000 cash for a giant investment firm aint right. If it doesn't look right, or smell right... it probably aint right...

****P.S This post is focused on reported cash - not account receivables, for all we know they could all owe each other money...****

[This is not right √ Do they have \$1.3bn in securities borrowed? IN ASSETS](<https://preview.redd.it/f39ajs8kvkl81.png?width=850&format;=png&auto;=webp&s;=7534122301a1f0541de401855f3c8d6a39d8e1d6>)

****Then \$1.2bn in securities borrow - or sold short. Listed in Assets -****

Lets look at Jane Street... Jane Street is another big market maker...

[Jane Street has \$12.2 million](<https://preview.redd.it/ars6bwl4wkl81.png?width=877&format;=png&auto;=webp&s;=12f37e2ec838aa1e0eef05c78688dedfed80a1cf>)

****The Jane St is not reported in thousands... why is this? I did say they have \$12bn in some other comments but upon further review have discovered Jane St does not report in thousands and they have \$12.2Million cash.****

****((speculative bonus bullet: Jane ST is reporting this way to appear bigger... its an odd way to report and someone going over this stuff quick would think they had \$12bn in cash like I did in some lost comments out there) its manipulative in my opinion...)****

****Virtu....****

[Virtu has \$661million in Cash](<https://preview.redd.it/1ez2672rwkl81.png?width=872&format;=png&auto;=webp&s;=05ab092582353f75cf0036621cb8acdcc4c388ef>)

****AGAIN, SECURITIES BORROWED - \$1.3BN - AND ITS IN THE ASSETS...****

****Ken sold short \$73bn and as we know he is negative \$65bn or more at cost - when he actually tries to**

buy the GME he will go bankrupt almost immediately imho... the only thing keeping Ken alive is selling more synthetics every day -**

Everyone has the same chart as schwab -

No seriously, they all use the same report... its like it came from one super computer algo... its like here... heres your free money... we use your assets in our super computer...

I do think Citadel runs the main algo... the participants all help the algo use them to move funds around and swindle retail- this is speculative but come on... same formatting on all the reports?

This is SEC rule 606... oh yeh the SEC knows all about it... lol... fuckers...

Once the markets start to tank next week these market makers are going to have to sell. SUS can't even pay staff with the cash on hand... they literally have to sell to keep the lights on.

[The FED is about to start unloading this...](<https://preview.redd.it/k2vbdlt5ykl81.png?width=717&format=png&auto=webp&s=f9b09a82ea48336ea2630ab3075c81605ce3f0c1>)

The FED has already started to shrink its Balance Sheet - (https://www.reddit.com/r/Superstonk/comments/t6q3x6/the_new_fed_numbers_released_on_march_2nd_show/)(https://www.reddit.com/r/Superstonk/comments/t6q3x6/the_new_fed_numbers_released_on_march_2nd_show/)

TL:DR: The Major Market Makers are the case for RICO... I would not be surprised if they one day discover the super computer... works on all of those market makers - to siphon money from retail to those "mostly" private co's... It seems that now the Gravy train has run out... that the market can't go any higher... I think that this crash is going to be really really big... they know this and thats why they have tried so long to suppress it. The situation the markets are in is very scary and if I didn't have GME DRS I wouldn't know what to do... thanks for listening to my talk... NOT FA

They all owe Billions in securities sold - its a giant scam about to collapse - market Makers are reporting their short sold securities as assets - wtf - Virtu for \$1.3bn, ken has \$73bn sold short and SUS has \$1.2bn in securities sold short - they are listing these as assets -

They have no where near enough Cash to cover the securities they sold short and the market is about to go in to a wild free fall - these firms are toast....(remember they have long positions also)

****The one thing people always say is... "but those market makers are properly hedged" bitch please... Ken is negative \$72.5bills... its a fugazi...****
