Hey everyone! I'm jacked as ever and buckled up for the squeezaversary. I hope you are too. I think hedgies r fukt, more confirmation on gme/ l r c partnership coming out, git hub leaks of the nft marketplace, market is about to collapse (give me my tendies!), gamma exposure, puts expire worthless, a bunch of degenerates bought otm calls, and I think we blast off friday! this time there is no escaping! hey ken, go fuck yourself!

[This is the the 1 week ](<https://preview.redd.it/lqluoqcukic81.png?width=1630&format;=png&auto;=webp&s;=720f2c85560f3d9c9f9dba3098e16aedbae5f483>)

I think this was the final dip before the rip!

every time stochastics RSI has been this low we have seen a significant rip shortly after. I showed the connections with the purple arrows. Big green candle incoming. This is the longest we've seen a descent and I think this is everything they got. It doesn't make sense to me that dropping the price like this is going to make us sell. All i've seen is that my ape fam loves dip and just has bought more.

There is a little room for down side. they could dip it to 69 before it rips into the thousands.

I honestly think hedgiies r fukt and R.C. is going to drop a bomb when they are the most vulnerable.

This is why I think hedgies r fukt. (can I be bullish on head and shoulders?)

I see a big head a shoulders on the 1 day, and indicators are pointing down

[This is B T C 1 week](<https://preview.redd.it/vlb8yoncnic81.png?width=1170&format;=png&auto;=webp&s;=1df47e6e892ae4fd6dd78b118e9567407dad3e4a>)

last year b u r ry called out the head and shoulders (purple)

well there is a bigger and more scarier one now (pink)

Id like to think of B T C as their savings, I think they have have been printing t e t h e r more then the usd and it's all about to come down.

to me it looks like vix it about to go up, indicating volatile times.

So if we put this together, we know hedgies r fukt soon, the market are about to fall off a cliff, and gme is on the verge of launching the market place?

TLRD: I think this is the last dip before the rip on 1/21 - 1-28

TARD: Moon soon

EDIT

[found this gem a little while ago ](<https://preview.redd.it/bivzh5bhqic81.png?width=590&format;=png&auto;=webp&s;=dd40ab8c01be2f717d506e37ef958204f5533e8c>)

More confirmation bias the nft announcement is coming soon
