The only interaction I have had with the GameStop NFT Marketplace was adding some ETH to my L2 on two occasions. I just happened to be bored and checked out my transactions...

[I made two deposits: Mar 3, Mar 23](<https://preview.redd.it/c0j4mdnty0s81.png?width=1123&format;=png&auto;=webp&s;=30f747e104126b9e0be20eb9ed38c08d7b34aedb>)

Can anyone explain all of these transactions? I haven't the slightest wrinkle when it comes to crypto/contracts/blockchain. All I can tell is that at one point I had about \$330k worth of ETH for probably a nanosecond on March 24. To me, that's a lot of money.

Probably Nothing.. Buying 2 more GME through ComputerShare just in case.
