I hope this question/ idea gets reaches a couple wrinkle brains.

Post “event” apes will be flush with cash and The “event” may well be the trigger to the end of this monetary cycle. If anyone has watched the hidden secrets of money series on YouTube, Mr. Maloney goes into detail how fast hyperinflation takes hold in an economy.

My thoughts on Post “event” will be to cash out of dollars into physical assets (property, precious metals, maybe even cryp-toe) as fast as possible. Of course we don’t know if hyperinflation will follow or if deflation hits, Mr Maloney makes the argument that government always prints more money, so hyperinflation is what I’m leaning towards.

What are apes individual thoughts on “cashing out” of the dollar or any other fiat currency where you may live?

I’m wondering if spending time to get trusts drawn up with attorneys and tax plans with accountants first thing is the most important. Or just keeping a rough log in your head (I.e. I made \$100 million, only spend \$45 million) while trying to “cash out” before the price of everything goes bonkers.

Buy. DRS. Hold.

I will not be selling any DRS shares as I believe GameStop will be one of the most valuable companies for decades.

Not financial advice, I’ve literally never made any money on an investment....yet.
