Sup Apes

not financial advice, I am very retarded

tell me I'm not the only one overly jacked...

I know I'm not.

The energy here has been off the chain and I'm here to get you even more jacked up for the days to come.

Buckle up, play this crank ([Non negotiable](https://open.spotify.com/track/57JVGBtBLCfHw2muk5416J?si=1422765a5d7f44b7)) and let's dive in!

I guess the first area I'd like to draw your attention to would be the cyclical nature of GME, but more importantly the WAVVVEEESSSS

I don't really know where to begin, I guess I'll start with the day to day price action. Many people including myself expected today to be a very green day, simply based off the cyclical nature of GME. To keep it simple, here's this visual once more:

<https://preview.redd.it/wma4mu85uzk71.png?width=2784&format;=png&auto;=webp&s;=ac63fea99b715e0ff267244067657216a10bc268>

I'd honestly argue this cycle is more similar to mid Jan (shoutout the apes that were around back then). Just compare the candle structures and it's a pretty compelling argument:

<https://preview.redd.it/gfz7qqohuzk71.png?width=2770&format;=png&auto;=webp&s;=f1ff9f28e6d1ca284a0f00a7cd503bfe655c5eb6>

So yea, the picture says it all imo. Let's talk projections for the coming days.

Also, before you hit me with the "TA dOeSn'T WoRk" I leave you with this

<https://preview.redd.it/bnblophtuzk71.png?width=1172&format;=png&auto;=webp&s;=5ae26c4f9ae8db0be58f54421d535a2e9b3bf9f9>

[one of my proudest calls](https://preview.redd.it/kmjshlhzfwzk71.png?width=2032&format;=png&auto;=webp&s;=19e0036e3b0c00317213e73d67bed37457b0fd65)

Anyway I'm gonna try to project what I think will happen price action wise over the next few days, starting with today.

2 possibilities but I'm taking the short term bear case (into tmr). With EW, your A and C wave usually have a 1:1 fib relationship, though wave 2 also targets ideally the .618 retrace of the wave 1. That being said,

today could have very well been the bottom of a wave 2 of 5, but I would like to lay out the possibility that we have more downside into tomorrow (not that it even matters)

<https://preview.redd.it/xmxusbwqxzk71.png?width=1072&format=png&auto=webp&s=3c6d379319604d66a39696573b65788ada6f27b0>

1:1 comes out to 202.57 and .786 retrace comes out to 203.02. I'd assume if we open red tomorrow we would bottom around 202.5 and then it's off to the races.

Now let's just assume the bottom isn't in (could very well be in but I love my 1:1 fib relationship). Let's project the targets of this wave 5, and this is where it gets really interesting.

This visualization is assuming all common ratios are hit.

<https://preview.redd.it/vjplx9r6zzk71.png?width=2762&format=png&auto=webp&s=097fb1c67cd51cf534c5b5b4f6b8c431ba8a90e7>

HOLD UP.

Who remembers my 288 target?

<https://preview.redd.it/vd15b0slzzk71.png?width=2764&format=png&auto=webp&s=46993555d1418350618805935e26a16de9a1a1e4>

I've said this before but I'm a little drunk so I'll say it again for the people in the back. We are currently in a wave 3 of 3 of 3 (I'll attach my full count below), but often times, the wave 1 **\*\*within\*\*** a wave 3 targets the .618 extension of the larger wave 1.

<https://preview.redd.it/c3lrqxmu40l71.png?width=2758&format=png&auto=webp&s=c1bd6021aacd586079547e7c427ef5de5fd6fdf9>

Isn't it crazy how this is shaping up? I fucking love fractals.

So yes, I still hold my 288 target, but with this outlined price action my conviction got a lot more, well, convicted.

The 5 waves within the current wave 5 are targeting 280-291 (Assuming we drop to 203 area tmr before starting to launch). if we DON'T drop tomorrow (very very possible) then the targets are adjusted by about 8 points, so 288 and 299 respective targets.

Will make a DD later going over projections after this 288 level is hit, but in EW, wave 2 is a sharp retrace, so after 288 it is very possible we see a steep retrace, but we simply don't know yet. Could be an ABCDE correction instead (think triangle) but again, we just don't know yet.

It doesn't even matter in the grand scheme of things, idk about you but I know where I plan to sell, and that price consists of 2 commas. soooooo, basically, no cell no sell for me. 40 milly a share or bust.

Really quick before I go, let's take a look at the option chain.

<https://preview.redd.it/4gs3qw9s00l71.png?width=1648&format=png&auto=webp&s=8b69721686f9f12f10dcf2a4d083bb833200483a>

LOOK AT THAT VOLUME! gamma ramp anyone? volume is on the left, open interest on the right.

these are only friday exp as well.

shorter post because i don't even know what else to cover, I basically transcribed a video analysis I did. If that's your thing, I encourage you to check it out. It will 100% make my posts easier to follow:

LETS GOOOOO

TLDR: if low isn't in today at 209 area, watch for 202.5 ish for low tomorrow. From there, 260 to 240 to 288 ish. Targets line up, tits are jacked, body is ready. Thanks for reading ■
