Dude everyone thinks I'm crazy, and I think everyone else is crazy. I've dealt in deep value stocks for years but have never endured bearish sentiment this heavy. I expect the narrative to shift in the second half of the year when investors start looking for ways to play the console refresh and they begin to see what I see.

I'll post the update tomorrow as I always do after data readouts. It will be ugly, and everyone will mock me as usual, but I expect GME to bounce back just as it did after the two previous earnings readouts.
