

Title: DD ASSISTANCE HELP - I am looking for verified, cited and comprehensive DD to piece together the way that naked shorting, dark pools, FTDs, ETS, roll forwards, etc are used to artificially (and illegally) manipulate lit market price. I have a means to get this information public in a big way.

EDIT - within 50 minutes this community provided enough input that I can run with it from here. I sincerely appreciate everyone who helped. To those that doubted me or my project - I understand your concerns - this is an intense situation and there many bad actors involved. If / when this project comes to fruition, I will be sure to let you know - even better - I hope that you will see it for yourselves.

I wish you all the best.

\\ \\

I have the opportunity to get verified, cited and comprehensive DD into the hands of people that can get it into the public arena in big way. I've messaged the MODS, CRIAND and others for help, but have not heard back. I can verify this opportunity with the MODS easily.
