I would imagine there are many apes from GME coming here and continuing to come here for a while. I would imagine many are new to crypto.

Can people help answer some basic questions that probably everyone should know about crypto and Loopring that would help inform any new HODLers?

1. Why was ETH created after Bitcoin?
2. What does Loopring hope to do that ETH does not provide?
3. How does this relate to the rumors behind GME and Loopring?
