I'm as smooth as they come and don't know how to upload multiple screenshots.

They've asked me to complete a one page form which is very simple, and they provide a reference guide for what details to fill in.

Cost USD\$130 up from the original \$50 quoted.

May take 10-20 days, or possibly longer.

They confirmed they do not lend shares out if that was a concern of mine.

I expressed concern about interference with being able to sell/buy in future and asked if there was any assurance that could be offered in that respect - pending reply.
