>GME price with a decrease today.

GME still within MOAW- bullish upside breakout on mini wedge as well.

GME continuing to barely stay above and follow LOG Trend Line (on the edge).

>TTM Scalper showing 3/5 Red Fire Signals.

GME Indicators (most) are showing a slight uptrend.

Stoch bottomed out last week and is on the move up this week. Could be exciting- could be nothing- could be anything.
