1) Ryan Cohen has made it clear that he publishes cryptic messages, I don't think anyone will debate that. Why? Less actionability maybe, or it's just fun? I don't know but it seems safe to interpret opaque meanings to his tweets.

2) His last [tweet](<https://twitter.com/ryancohen/status/1496304618531602432?s=21>) was his 69th which is a number that reads the same right side up and upside down. Also in his local time when he tweeted it was 22022022 (ddmmyyyy) which is a palindrome.

3) Many people have already pointed out that the emojis of his last three tweets (📉, 📊, 📈) read "shorts arrr dead" which is a version of the common phrase "hedgies r fuk". Note also that the emojis read in chronological order (dead arrr shorts) could stand for DRS.

4) Point 2 highlights a general theme of forward = backward. Point three shows a forward and backward meaning to Ryan Cohens latest tweets.

Conclusion: As by the points raised in this post it is highly plausible to assume Ryan Cohen is suggesting that directly registering shares is bringing down the ones who are short our company and with them their fraudulent and criminal structure.
