1. Since the 2021 end of January peak at 28,045 shareholders, we have lost -7,039.
2. I have no data between 2021-05-25 to 2021-10-29, but in that period we lost -1,044.
3. Since the 2021 end of January peak, lowest recorded was 2021-11-30 at 20,143.
4. 2021-11-23 showed 20,169 shareholders, meaning end of day shareholders 2021-11-22. This was the last green day, with a high of 249,64, before the steep decline all the way to 86.29 during 2022-01-24. Since that green day, we have gained +837 shareholders.
5. Since the count in May 2021, with 322,545 shares held by 20,023 shareholders, we have gained +983 shareholders as of 2022-02-01.
  - A) As we don't know how many shares each holder has, average share could have decreased or increased. Large positions could have exited and small holdings could have bought in. Shareholders could have acquired more, or sold off and saved a few or only a single share. **We just don't know.**
  - B) If one assume average share of 16.1 is unchanged, the total shares held by shareholders on Avanza would be 338 380, a change of +15,835 or +4.9%.
  - C) If one assume the average shareholder holding has increased since May 2021 by 0.9 shares, an average of 17 on 21,006 shareholders would mean 357,102 shares held on Avanza, a change of +34,557 or +10.7%.
