EDIT: This is not financial advice. Everything disclosed in the post was done by myself, with public information. I came to my own conclusions, as should you.

**\*\*TL;DR - Citadel Securities has been fined 58 times for violating FINRA, REGSHO & SEC regulations. Several instances are documented as 'willful' naked shorting. In Dec 2020 they reported an increase in their short position of 127.57% YOY, and I'm calling bullsh\*t on their shenanigans.\*\***

I've been digging into the financial statements of Citadel Securities between 2018 and 2020. Primarily because Citadel Securities *actually* has a set of published financial statements as opposed to the 13Fs filed by Citadel Advisors.

First... Citadel is a conglomerate.. they have a hand in literally every pocket of the financial world. Citadel Advisors LLC is managing \$384,926,232,238 in market securities as of December 2020...

Yes, seriously- **\*\*\$384,926,232,238\*\***

\$295,347,948,000 of that is split into options (calls & puts), while \$78,979,887,238 **\*(\*\*\*\*20.52%\*\*\*\*)\*** is allocated to actual, *physical*, shares (or so they say). The rest is convertible debt securities.

The value of those options can change dramatically in a short amount of time, so Citadel invests in several "trading practices" which allow them to stay ahead of the average 'Fidelity Active Trader Pro'. Robinhood actually sells this data (option price, expiration date, ticker symbol, everything) to Citadel from it's users. Those commission fees you're not paying for? yeah.... think again.. Check out [Robinhoods 606 Form](<https://cdn.robinhood.com/assets/robinhood/legal/RHS%20SEC%20Rule%20606a%20and%20607%20Disclosure%20Report%20Q4%202020.pdf>) to see how much Citadel paid them in Q4 2020.. F\*CK Robbinhood.

Anyway, another example is Citadel's high-frequency trading. They actually profit *between* the national ask-bid prices and scrape pennies off millions of transactions... I'm going to show you several instances where Citadel received a 'slap on the wrist' from FINRA for doing this, but not just yet.

Now.... the **""totally, 100% legit, nothing-to-see-here,\* \*independent\*""** branch of Citadel Advisors is Citadel Securities- the Market Maker Making Manipulated Markets. The whole purpose of the DTCC is to serve as an third party between brokers and customers (check out [this video](<https://www.youtube.com/watch?v=qtkaMx12otQ>) for more on DTCC corruption). I'll bring up the DTCC again, soon.

Anyway, Citadel Advisors uses their own subsidiary (Citadel Securities) to support their very "unique" style of trading. For some reason, the SEC and FINRA have allowed this, but not without citing **\*\*them for 58 'REGULATORY EVENTS'\*\***.

So that got me thinking.... "WTF is Citadel actually putting out there for the public to see?" Truthfully, not much... a 12-page annual report called a 'statement of financial condition'.

Statement of Financial Condition in 2018.

Throughout the COVID pandemic, we all heard the stories of brick-and-mortars going bankrupt. It was becoming **\*VERY\*** profitable to bet against the continuity of these companies, so big f\*cks like Citadel decided to up their portfolio... by **\*\*127.57%\*\***.

That's right. Citadel Securities upped their short position to **\*\*\$57,506,000,000\*\*** in 2020.

EDIT: Credit to u/[JohnnyGrey](https://www.reddit.com/user/JohnnyGrey) for the deeper-dive, here..

You see the highlighted section below? Citadel (and other companies reporting highly liquid securities) uses 'Fair Value' accounting to measure the amount that goes on their balance sheet (including liabilities like short positions). The cash that Citadel received (asset) was accounted for when the security was sold, but the liability (short) needs to be recorded at the **CURRENT MARKET PRICE** for those securities while they remain on the balance sheet..

At the end of 2020, the 'Fair Value' of their short positions were \$57 billion.

At the end of 2021, however, Citadel will need to adjust the value of those liabilities to their CURRENT market value... Since we don't know the domestic allocation of their short portfolio, you can only imagine the sh\\*tunami that's coming for them..

We [KNOW](<https://wallstreetonparade.com/2021/02/citadel-didnt-just-bail-out-a-gamestop-short-seller-citadel-also-had-a-big-short-position-in-gamestop/>) that Citadel "had" a short position in \$GME along with Melvin Capital... Can you imagine the damage that r/wallstreetbets has done to the other stonks in their portfolio? If Melvin lost 53% in January from this, there's no telling what the current 'Fair Value' of those shorts are..

**\*\*I trust a wet fart more than Citadel, Melvin, and Point 72.\*\*** [Here's why]([https://files.brokercheck.finra.org/firm/firm\\_116797.pdf](https://files.brokercheck.finra.org/firm/firm_116797.pdf)).

Let me shed some light on a \*FEW\*:

-

Naked shorts, failure to provide documentation to SEC, short selling on trade halts..... is this starting to sound familiar? When r/wallstreetbets started exposing the truth, they lost the advantage. Now that the DD is coming out about this sh\\*t, they're getting desperate.

[Price drop of 40% in about 25 minutes](https://preview.redd.it/00b5hrc96tm61.png?width=359&format=png&auto=webp&s=ac4247e1bf857c4e94d0479b5fe32a8b49c9799a)

The volume of shares flooding the market- at the same exact time- was premeditated. I can say that with confidence because several media outlets (mainly MarketWatch) published articles WHILE this was happening, after nearly a week of radio-silence. MarketWatch even predicted the decline of 40% before the entire drop had occurred. When Redditors reached out to ask WTF was going on, the authors set their Twitter accounts to private... slimy. as. f\*ck.

Yup! and here are **TWO** more instances:

A series of horizontal lines for handwriting practice. Each line consists of a solid top line, a dashed middle line, and a solid bottom line. Between the solid lines, there are numerous slanted strokes (diagonal lines) that serve as a guide for letter height and slant.

\$2,440,000 for [Wedbush](https://www.sec.gov/news/press-release/2014-263)...

But what we can do is look at the steps they're taking to prepare for this sh\\*tunami. So let's summarize everything up to this point, shall we?

- We know that Citadel is on the hook for \$57,000,000,000 in shorts, but at least they're HODLing onto some physical shares as assets, right?.... RIGHT??

Well that's just terrific, because the DTCC just implemented [SRCC 801](https://www.dtcc.com/Globals/PDFs/2021/March/05/SR-NSCC-2021-801) which means they **\*\*DON'T\*\*** have your fl\*cking shares... I've seriously never seen so much finger pointing and ass-covering in my LIFE....

The pressure being placed on hedge funds to deliver has never been higher and the sh\*t storm of corruption is coming to a head. Unfortunately, the dirty tricks & FUD will continue until this boil ruptures. There are several catalysts coming up, but no one truly knows when the MOAB will blow.

However, desperate times call for desperate measures and we have never seen so much happening at once. For all of these reasons and more: **\*\*Diamond. F\\*cking. Hands.\*\***
