Is\_self: True

Hi everyone, I was going to work on adding content to Econiverse today and I wanted to see if anyone else wanted to help? Here are the pages that still need to be built:

- \* Fundamentals - Account Types - [Cash vs. Margin]([https://econiverse.github.io/fundamentals/account\\_types/cash\\_vs\\_margin/](https://econiverse.github.io/fundamentals/account_types/cash_vs_margin/))
- \* Fundamentals - [Psychology](<https://econiverse.github.io/fundamentals/psychology/>) (of trading)
- \* Technical Analysis - [Indicators and Oscillators]([https://econiverse.github.io/technical\\_analysis/indicators\\_and\\_oscillators/](https://econiverse.github.io/technical_analysis/indicators_and_oscillators/))
- \* Technical Analysis - [Support and Resistance]([https://econiverse.github.io/technical\\_analysis/support\\_and\\_resistance/](https://econiverse.github.io/technical_analysis/support_and_resistance/))
- \* Technical Analysis - [Advanced Techniques]([https://econiverse.github.io/technical\\_analysis/advanced\\_techniques/](https://econiverse.github.io/technical_analysis/advanced_techniques/))
- \* Strategies - Options - [Basic](<https://econiverse.github.io/strategies/options/basic/>)
- \* Strategies - Options - [Advanced](<https://econiverse.github.io/strategies/options/advanced/>)
- \* Or, add content to any existing page or suggest a new one

**\*\*Anyone can contribute.\*\*** If you are familiar with GitHub, feel free to submit a pull request. If not, feel free to reach out to me and I can teach you how. Instructions can be found [here]([https://econiverse.github.io/help\\_build\\_econiverse/](https://econiverse.github.io/help_build_econiverse/)). It really is easy!
