I used high prices intraday for these dates. This is all public data and information from 2021. High volume highlighted in blue. Heavy shorts randomly highlighted brown. Very heavy shorting end of December 2021. Read up on gherkinit's DD for more info on how the rollovers cycles work. February is coming. Ryan tweeted something sex related (which usually means within a week prices go up). Maybe FTD being covered next 2 weeks? I am sure he will post again before February 21 ish.
