I am an author of the DRS guide for the DriveWealth / Revolut. Since publishing my post, I have been receiving feedback from various people.

https://www.reddit.com/r/GME/comments/qudsh6/drs_from_revolut_to_computershare_without_third/

Recently I have been talking to /u/cheezpeez (cannot post) who claims that he was able to receive Computershare account number from CS support. The steps that he took are as follows:

- call US toll free number (+1 800 522 6645, free with Skype)
- ask the agent if Computershare received the shares
- go through the Computershare verification process (name, surname, address, email, phone number etc.)
- ask for Computershare account number

****! IMPORTANT !**** while going through the verification process, remember to provide the same data as you had with your brokerage from which you have started the DRS transfer.

Knowing the Computershare account number gives you the ability to create an online account in CS portal. You do not have to wait for the first letter, which significantly speeds up the process. Bear in mind, that in order to have Computershare account activated, you need to receive the verification code. Currently the codes for EU are being sent from Computershare UK, but there is also a possibility to get it by email (read "Update 3" from DRS guide).

Hope that helps.
