Tried posting on [r/Superstonk](<https://www.reddit.com/r/Superstonk/>) , original post by [u/v7o](<https://www.reddit.com/u/v7o/>) on [r/Superstonk](<https://www.reddit.com/r/Superstonk/>).

Thank you [u/v7o](<https://www.reddit.com/u/v7o/>) for the amazing discovery! Check his original post out [here.](https://www.reddit.com/r/Superstonk/comments/s7o7pf/if_someone_had_told_me_this_was_gme_i_wouldve/)

After a bit of digging and seeing the similarities in the algorithm being used on BRN.AX and GME, I decided to make a couple edits with some crayons to help other fellow smoothbrains see the similarities as well as making a few comments on things I've noticed!

I'll post the separate charts with the colour coordinated date/spike marks so we can follow along where we are on the timeline compared to BRN.AX. Then I'll post them together with annotations I've made and I'll copy and paste them below for anyone needing translation!

[BRN.AX chart dating back 2 years exactly, we can already see the similarities.](<https://preview.redd.it/h2lmc9boznc81.jpg?width=1078&format=pjpg&auto=webp&s=6d3f22e6c5c277aebbea82dd9857da5056602339>)

[Our beloved stonk GME looking *chefs kiss* beautiful!](<https://preview.redd.it/jwc6yn6rznc81.jpg?width=1083&format=pjpg&auto=webp&s=00132a1684a7fecf42a1f9439b3ca96dc1eec419>)

Feel free to zoom in on this!

[Forgive the cringe captions, I'm tired and excited, u/v7o really got me outta left field with this!](<https://preview.redd.it/2w96uz0uznc81.jpg?width=2538&format=pjpg&auto=webp&s=48366c21740b88acb2f09c3fadcc758039aba164>)

Red arrow annotation:

"Holy moly! Something happened here, I don't know what. Could this shortened time space on GME be the result of Hedgefunds changing up the algorithm temporarily whilst they prepped? Could the sudden second trading volume spike in GME after the first spike have skipped this elongated process that happened with BRN.AX?"

Black brackets annotation:

"Look at that trading volume! Same initial spike on the first squeeze, with active engagement from then on with BRN.AX! GME however, it's been radio silence since then! Is this the result of Apes DRS'ing and buying up the float?"

Purple arrow annotation:

"I think we're here?"

I'm very super smooth brained, as you can tell with the crayons I've used. Am I grasping at smoke here Apes or has [u/v7o](<https://www.reddit.com/u/v7o/>) really exposed the algorithm the HF's are using and abusing?

Is this the ultimate confirmation that the price is fake and exposes market manipulation? The similarities are too much to ignore in my opinion.

****TL:DR**** \- Market manipulation confirmed? HF's f*cked? MOASS soon?

BUY, HODL, DRS.

Have a great week apes!
