She has read the DD and understands it and wants to help. She is from the INSIDE and knows the culture. If she can help us put it in a form that the SEC hierarchy likes and is easy to digest at all levels, we should be THRILLED! Don't look a gift horse in the mouth.

We are getting bogged down with anger because it sounds like SEC doesn't know anything, when we should be concentrating on making it easy for everyone to understand. Including Congress and the media. Voluminous DD has been great for all of us learning as we go, but the sheer amount of it is daunting.

You gotta understand.. most members of congress are just regular people. They might not know anything or very little about stock market, let alone how it functions and how it gets taken advantage of. I believe we need to really focus on taking our GOD TIER DD and breaking it down so even a 5 year old could understand. Once we compile all the relevant info and "ELI5" it, I think we will have much more success with our future endeavors with the SEC.
