

Title: Tell me the SHF are getting desperate without telling me they're getting desperate. First time ever getting an email like this in over a year of only holding GME.

What are some of the potential risks and important considerations of participating?

Security price. There is the potential for downward pressure on the price of a security if the security is borrowed to facilitate a short sale.

Dividends. If you have a security on loan to Schwab when it's scheduled to pay a dividend, you will either receive the dividend or a substitute payment in lieu (PIL) of dividend. You may have to pay a higher tax rate on a PIL, but Schwab currently issues a discretionary payment to help compensate for additional taxes.¹

Voting rights. Upon lending a security to Schwab, you will lose the right to vote on corporate actions by the issuer.

Loss of SIPC protection. Because borrowed securities may not be covered under the programs of the Securities Investor Protection Corporation (SIPC), loans are secured by collateral provided by Schwab.

To learn more about the program:

- Visit schwab.com/securitieslending
- call us at 877-793-8872, Monday through Friday, 8:30 a.m. to 4:00 p.m. ET.

Thank you for investing with Schwab.
