Hi Apes, I am *trying to find some comprehensive DD or posts that outline as many of the fines as possible as issued by the SEC against MMs and SHFs for their manipulation of the markets.* Any help you could give by listing in the comments or Direct Messaging me would be greatly appreciated!

We know the fines do not equal the crimes, and are just considered as part of doing business by the more corrupt MMs and SHFs. ***Until the fines increase to the point of wiping out the profit made by their manipulation, and potential jail time is introduced, we likely won't see any changes in their behavior.***

This also helps in explaining to others how GME has accumulated so many counterfeit shares and has the MOASS potential it does.

Buy, Hodl, DRS & Share the Story! GME to the moon fellow apes! And thanks for your help!
