Currently last ortex post I saw was 68,000,000 in shorts so

68mil X 4\$ gain over last week is a 272,000,000\$ loss for shorts!! Ouch!!

62\$ more to go to get to 100\$ a share so if shorts don't close 68mil X 62\$=

4,216,000,000 loss (used 100 cause simple math not trying to price anchor) but dang every 5\$ up in share price is a staggering 340,000,000 loss something tells me that when this is truly over the shorts will be seen as the greatest I told you so by everyone across the world gme!!!
