Linked Post Content:

Let's start with Zombie Stocks.

Question: Why was this security (BlockBuster) not halted on 5/12/22?

Information on halts for delisted securities:

<http://www.pennystocks.org/halts-and-delistings.php>

Additional: If any policy allows this, the policy is no good. I want to discuss the implied meaning.

[This is the Company that Liquidated Blockbuster LLC.](<https://preview.redd.it/m75hvaso0gz81.png?width=942&format=png&auto=webp&s=c62f70f654d26e70bc161d1c0b9c9c810934e5e3>)

One more view:

[That's Quite an Impressive Gain. \((+ Infinity \%)\) Wow.](<https://preview.redd.it/7lx848kr0gz81.jpg?width=1620&format=pjpg&auto=webp&s=aaba4455dd2a8f0f30976b15c5ba4db6c58f82cb>)

I have posted some information about the company below.

[Wikipedia Data about BlockBuster LLC.](<https://preview.redd.it/0re6fn6u0gz81.png?width=328&format=png&auto=webp&s=a17d50f2f4dc222ebd9049b2325233880b71a06>)

Here is some other data that is important to consider before answering our question.

[We can see when Blockbuster went out of Business.](<https://preview.redd.it/4pcdxj6x0gz81.png?width=903&format=png&auto=webp&s=f9f87628328a01bd5ce074e6142723a356b06efa>)

Let's zoom in on the timeline of recent events.

[What the..? Is This What Infinite Leverage Looks Like?](<https://preview.redd.it/dvoemcsz0gz81.png?width=1483&format=png&auto=webp&s=cdc6f7bda76f0f863c98141678218ae5ea540a0b>)

****You can see that the +4300% gain on 5/12/22 is small compared to some recent data in this graph. This company still exists today and is used for leverage.****

(It is in someone's (Market Makers / Hedge Funds) portfolio).

[Recent Pops in this Stock Price are on 12V18V19 and 1V28V21. Take Note of the Candle Size and Nature.](<https://preview.redd.it/5qi8j4n31gz81.png?width=1430&format=png&auto=webp&s=78544725b1962877c3be7786909fdb72290146b6>)

[I have Circled some Notable Stats from BLAIQ.](<https://preview.redd.it/wyfw5wy71gz81.png?width=1073&format=png&auto=webp&s=9fc215f40adad145985e9c773b8a91b9a59c0a6c>)

Here is a great DD with some additional information on Zombie Stocks:

[https://www.reddit.com/r/Superstonk/comments/pihiz2/zombie_stocks_spiking_are_a_result_of_shfs/](https://www.reddit.com/r/Superstonk/comments/pihiz2/zombie_stocks_spiking_are_a_result_of_shfs/)

Now we can compare this situation to some of the events taking place in the market today.

[GME is Halted 4 Times on 5V12V22 during a Price Increase from about \$78 to \$109 \((or about a 28%

Move to the Upside\). Notably, AMC Entertainment \(\Left, Above\) did not see any Halts. This has to do with a Narrative of Division Against the Apes.](<https://preview.redd.it/m9csjifa1gz81.png?width=1406&format=png&auto=webp&s=99729764dd42d7c8681567e061d8bcc341c26d39>)

****For the record, If GameStop**** (Share price = 89.57 on 5/12/22 close) ****saw gains of 4300% in 1 day like BLAIQ, the share price would close at \$3,941.**** (X,XXX,XXX% or more amount of gains are possible.)

BLAIQ has seen gains larger than this in one day before. Gamestop and AMC have been designated as targets by malicious short-sellers in a similar manner that Blockbuster has seen in the past.

Now some simple math below shows us how to associate the information from BlockBuster into Memestocks:

[Associating BlockBuster Volatility Data Across AMC\GME Data to Determine Theoretical Potential Future Share Prices. I Believe These Estimates to be \\"Conservative\\"](<https://preview.redd.it/0rl0wl6d1gz81.png?width=1549&format=png&auto=webp&s=f7d10d3491e79d852f1433568e0aa866e3b7427d>)

If options run in the money during this type of price action, exponential gains can be made. You can imagine how much money is involved with derivatives in the options chain; (510T). Some banks today are overleveraged as much as 235:1. AMC and GME both are currently running a 100% Utilization streak.

Here is a link to an options profit calculator for reference;

(<https://www.optionsprofitcalculator.com/>)(<https://www.optionsprofitcalculator.com/>)

Here is a percentile gains calculator;

(<https://www.calculatorsoup.com/calculators/algebra/percentage-increase-calculator.php>)(<https://www.calculatorsoup.com/calculators/algebra/percentage-increase-calculator.php>)

Lastly, here are a few links overviewing AMC and GME individually; Feel free to look up any part in each saga to fill in any missing information and questions you might have as we look at the bigger picture here.

GME: (<https://fliphtml5.com/bookcase/kosyg>)(<https://fliphtml5.com/bookcase/kosyg>)

AMC: (https://www.reddit.com/r/amcstock/comments/qlvcmh/endless_dd_all_about_amc_stock/)(https://www.reddit.com/r/amcstock/comments/qlvcmh/endless_dd_all_about_amc_stock/)

Let's talk about CryptoCurrency and Leverage.

[Bitcoin's 19M coins in circulation have a daily Volume of 65B. That is a ton of exchanges. How many people can afford 1 bitcoin at the current prices?](<https://preview.redd.it/m3uop3nf1gz81.png?width=1135&format=png&auto=webp&s=8c05e22691007536d0d09b956c550d2b2003b5e4>)

Here is a link with an example of a stable coin crashing and some additional information (Credit: Piers Curran)

(<https://www.linkedin.com/feed/update/urn:li:activity:6930241860292521985/>)(<https://www.linkedin.com/feed/update/urn:li:activity:6930241860292521985/>)

Much of today's overleveraging is connected to the market of Cryptocurrencies. Cryptocurrencies are plagued with decentralized and nonregulated fallacies. Criminals love it. I'll keep the crypto part brief because those are the main points that apply to this non-fundamental situation, which brings me to my next point, the executive order chain.

[The Next Order in the Executive Order Chain](<https://preview.redd.it/zviu5sph1gz81.png?width=405&format=png&auto=webp&s=c80d2aa1466752e40650beb8216943e80411aed2>)

So an important catalyst in the meme stock movement has been concealed within a few Executive orders.

Here are links:

Executive order 13959: <https://home.treasury.gov/system/files/126/13959.pdf> (This order was implemented on January 28, 2021 - Extended to May 27, 2021) Wow.

Executive Order 14032: <https://home.treasury.gov/system/files/126/14032.pdf> (This order is set to be implemented on June 3, 2022)

Here is a Great DD posted by another ape (Reddit [[u/owter12/](https://www.reddit.com/u/owter12/)](<https://www.reddit.com/u/owter12/>)) explaining this coincidence further.

[https://www.reddit.com/r/Superstonk/comments/ujmr6i/why_executive_order_could_cause_gme_to_moass/](https://www.reddit.com/r/Superstonk/comments/ujmr6i/why_executive_order_could_cause_gme_to_moass/)

I'll close this section with this comment, I don't think they can extend this past the November election cycle. I actually think they can't even push it past this June. (I have January 2023 Long calls) Here is why.

****May 27th**** = 1 year anniversary of AMC's previous run-up (T+365) cycle completes much-anticipated data.

****June 2**** = Meeting for GME (discuss the stock split, etc.)

****June 3**** = Executive order 14032

I posted this DD ↓ in the Reddit community: **theydidthemath** last week which is becoming quite popular:

[https://www.reddit.com/r/theydidthemath/comments/uhb2ho/self_math_behind_the_fed_printing_inflation_gdp/](https://www.reddit.com/r/theydidthemath/comments/uhb2ho/self_math_behind_the_fed_printing_inflation_gdp/)

This post ↑ includes real data and estimates to calculate future moves in meme stocks.

I posted a response to some questions that were answered where I discussed some of the related factors and FAQs in the comments. Some of the info was buried by comments, so here it is!

[https://www.reddit.com/r/theydidthemath/comments/uhb2ho/comment/i7m28qu/?utm_source=share&utm_medium=web2x&context=3](https://www.reddit.com/r/theydidthemath/comments/uhb2ho/comment/i7m28qu/?utm_source=share&utm_medium=web2x&context=3)

It appears the economy is receding and the house of cards is falling. Mega cap stocks ******(Notable mention, of Netflix; nearly -75% in the last 6-months)****** are losing much value and space in the marketplace. Small and mid-cap companies that are over shorted will soon have enough space in the market to "squeeze." Hopefully, this will restore faith in the USD and the market as a whole. (About 510 Trillion USD currently exists in overleveraged derivatives that need to be "corrected") The value of REAL GDP should be around a healthy 140 Trillion today. The market is also insured for the amount of 67 Trillion. Most of this 510 Trillion has been discovered in FTD cycles, options chain anomalies, dark pool abuse, and PFOF control. How much longer will the can be kicked? Will we see a free and fair marketplace? Tik-Tok.
