After trying to connect my existing TrustWallet through Wallet Connect, trying to buy Ethereum through Ramp and taking a video of my driver's license, finally giving up and using MoonPay to buy Ethereum, transferring L1 to L2, and then the UI is terrible on iPhone and I can't even see the NFTs...

I'm all in on GameStop. I've DRSeD xxxx of GME. I know about crypto and LRC and L2 roll up to avoid gas fees. But my cousin, who might be the market for a COD weapon NFT, is not going to get this. It has to be so much easier. It has to be one-click through the GameStop app. Ape will go through all the hoops. A lot of people won't.

I realize it's a beta. But it's not an alpha. It has to get a LOT easier for wide adoption.
