Is_self: True

Body:

Hey friend, has anyone talked to you about gamestop yet? It's this gaming company taking over the market Brick by Brick . They're a video game retailer that wasn't in the news recently. They had a huge debt at the beginning of this year, but they have completely turned their situation around. I bet it doesn't even hurt the board members to step on an apple or amazon. The fundamentals seem appealing in a way that I see as unlimited potential. DFV did too. Definitely an extreme upside in the near future, hence my extremely bull thesis.

I think that if you were going to look at the financials , they would speak VOLUMES to you. Personally I like the approach of just ignoring the price and flipping a coin. Is this a good time? I just flip it until i get heads. Heads is a yes. It's amazing to see such amazing potential come from a board with such amazing talent. Did you know they even own Thinkgeek? Also known as Geeknet, they make all kinds of awesome gamer like caffeinated soap so you can WAKE UP when you shower, among many other things. Another awesome company they have acquired over time is Micromania, which is an industry leader in online video game retail.

Not just that, but According this picture it's easy to see all things point to gamestop.

<https://preview.redd.it/rxutxbwuuh71.png?width=1251&format=png&auto=webp&s=486b7c99152d288561121c974d8a4141c8aa3549>

They even have this NFT project that they have started, the implications seems really amazing. Especially for the CREATORS in this world. Just think! NFT's are so versatile they can be applied to video games, DLC items, art, songs, and even real life items too! Hat's, shoes, dog food, anything at chewy.com.. Just think about it! This could be the new way that all stores work in the entire world, if all items had a barcode with NFT's behind it. Man. Wouldn't that be a dream? Totally possible. I call this extreme potential. I'm a DREAMER among other things. I wish you guys could see what I see when I'm dreaming. Always dreaming. Maybe we could even plug in wirelessly through some cool innovative technologies, incorporating digital art , media and games to revitalizing the gaming experience to a whole new level. I see unlimited potential in this aspect. Wireless technology has come far. Very exciting times. Very exciting.

In case you've never heard the company was founded in 1984 in honor of ****Charles Babbage****: The Father of Computing. Babbage was the father of the computer. He was doing math tables and wanted to make "A machine that would eliminate human error in data sets." I believe the quote involved using a steam engine. Poetic right? Babbage's became the GAMESTOP and both will fix human error in data sets. Very exciting.

[The man who started it all. .VoV](<https://preview.redd.it/sksgr5n24vh71.png?width=261&format=png&auto=webp&s=145839bc33149b44c8576c812fd5e783e25b7a8b>)

As an investor, I am a PLAYER. I want READY PLAYER ONE to happen someday soon. And the only way that happens is if GAMESTOP SUCCEEDS.. so I say this thing that we are in matters. And this company got my eye before i knew anything about deep value investing. Gamestop is actually how I know anything. Without it you would never have read a word about any of this. How to play the game I see before me. And now I believe. This chairman is a genius on a level the world has yet seen. I have faith he will take care of all of his investors. I mean c'mon! ~6000% since the beginning and it hasn't even started? I did the financials and I don't see any negatives in the way that RC runs his companies. He dominates.

I know our friend [DFV](<https://www.youtube.com/watch?v=uiO1ITRcjeA>) is away. I hope he gets to be here with us. Until then I guess you get me while I am here. And I got these diamonds hands. And I got

Ryan Cohen. And he's got me. To quote him from a [bloomberg article](https://www.bloomberg.com/news/articles/2021-06-09/ryan-cohen-rallies-gamestop-reddit-crowd-at-annual-meeting?utm_content=business&utm_medium=social&utm_source=twitter&cmpid=socialflow-twitter-business&utm_campaign=socialflow-organic) article : "We are trying to do something that nobody in the retail space has ever done," Cohen said at the gathering, held in GameStop's hometown of Grapevine, Texas. "But we believe we're putting the right pieces in place and we have clear goals: delighting customers and driving shareholder value for the long term." And I believe him.

So I believe this is almost

This is not financial advice. I'm not an advisor. I did the videos because I wanted everyone to see what I see. And that is the undefinable value of an up and coming business. Unlimited upside isn't something I see very often. But when I do, I LIKE THE STOCK.

Enjoy the MOASS. They never covered.
