I am an ape since December 2020, when the GME conversation was seen as a joke, a meme stonk impossible to change the finance industry's business model.

I had my doubts and made some money with movie stock buying at 4USD.

Less than a month th ago I DRSeD my GME shares and today added few more to the pool, total 85.

I want to say that I am amazed on how far we got, I am proud to belive and document myself about this topic but more than anything I feel we are closer than ever to the end.

You ask yourself why? Let me share my view as member of multiple subreddits following the same 1,2,3 stocks:

1. DRS proof and questions are 3 quarters of all posts. I think FOMO installed as people see this is happening and they want part of the profit.

2. GME is the main play - mass media is trying to divert with smaller squeezes to hide the real system wrecking ball which is GME.

3. I am sure that multiple squeezes will follow: movie stock, BBBY and GME as final boss. I read the DD about movie stock being the money source for shorting GME but I have my doubts on that as I feel that movie stock will squeeze as well. Money from there will go for more GME.

4. Most of us are in both: movie stock and GME. Movie was the cheap version for a while. Everyone redirected funds towards GME buying after the dividend made the price more affordable, hence more DRS for europoors

5. Nobody has a clear understanding on how many people are actually. I see sub reddit from UK, NZ, Mexico etc. We are much more than expected and more of us brought in friends that are not in reddit. I bet we are few millions extra investors than members of this subreddit.

6. Buy, hodl, DRS - this is the play.

As final words: thank you beautiful, crazy apes.

It was a pleasure to buy, hodl and DRS with you.

Do not forget that we need to hold for people with 2-3 shares, but mostly we hold to CHANGE THE SYSTEM!!

Kenny and the crew fckd everyone with their manipulation. payback time!!

Regards,

Azzy
