With 2 June approaching let's look into the next possible move by our beloved company;

From page 37 of Gamestop's June 9, 2021 SEC filing.

"If a depository for a series of securities is at any time unwilling, unable or ineligible to continue as depository and a successor depository is not appointed by us within 90 days, we will issue individual securities of such series in exchange for the global security representing such series of securities. In addition, we may, at any time and in our sole discretion, subject to any limitations described in the applicable prospectus supplement relating to such securities, determine not to have any securities of such series represented by one or more global securities and, in such event, will issue individual securities of such series in exchange for the global security or securities representing such series of securities."

TDLR: You corrupt bastards we are starting our own blockchain stock exchange and putting every Gamestop share there.

At that time the rumored Wutang anchored dividend could be issued to each investor, even idiots like me too smooth to understand crypto wallets.
