Questions?

▼ What is an NFT?

The acronym NFT stands for non-fungible token. Non-fungible tokens are digital assets that can be used to represent unique items. Things like art, collectibles, game items, and real estate can have their ownership tied to non-fungible tokens, but that's just the beginning of what NFTs are capable of representing. Blockchains such as Ethereum ensure that an NFT can only have one owner at a time - like an unforgeable digital receipt to verify the authenticity of the item being represented.
