

Title: Wrinkle brain needed! Possible variation of CDOs that crashed the economy in 2008. Contingent Coupon Callable Yield Note. Just like they packaged defaulting mortgages into CDOs, now they're planning to package defaulting equity indexes into CYNs.

Got a tip from anon ape pointing towards something like CDOs that were responsible for the 2008 collapse. Here's a [video](https://www.youtube.com/watch?v=EEXTqtH-Oo4) of the CDO dude in The Big Short explaining Collateralized Debt Obligation (CDO).

Say hello to Contingent Coupon Callable Yield Note

Basically, just like in the movie, it's dog shit, wrapped in cat shit, or in this case, **equity indexes** \- wrapped in a **contingent coupon callable yield note** \- where the **coupon** is linked to the performance of the worst of three.

These indexes or stocks are represented as "underlyings" and can be things like NASDAQ 100, RUSSEL 2000, and the S&P; 500 Index in a same box.

Here are the underlyings for Credit Suisse in their filing from 2 days ago:

I have no idea what the hell this means, but here's a bunch of these filings so other apes can search

And the last thing I'll mention is that all these filings are **"Filed Pursuant to Rule 424(b)(2)."** In my [post](https://www.reddit.com/r/Superstonk/comments/pmtqig/cellar_boxing_cme_citadel_citi_apex_apollo_and/?utm_source=share&utm_medium=web2x&context;=3) earlier I touch on **"Rule 424(b)(4)"**
