Thanks to those who tuned in live to the AMA this evening. As these AMAs can be pretty lengthy, and not everyone has time to sit down for an hour, please find some navigation links below that you can use to watch the relevant section of the recording.

I also want to state, that these guests have not been researching GME for 8+ months, are extremely busy and do not have time to read our DD. This is beneficial as we can get an unfiltered and unbiased view of their thoughts on x, y, z matters. The main point of these AMAs is to take what insights we can from their experience and apply it to the research within our sub and many other GME subs to benefit from (and of course, enjoy listening to some wise people talk about our fav subject).

Also, a special thanks to [Lucy](<https://www.thekomisarscoop.com/>) and Rob for taking time out of their busy days to bring us this knowledge.

Hope you enjoy and I look forward to announcing our upcoming AMAs!
