I keep seeing people commenting that they haven't made a wallet for several reasons:

- * "I don't use Chrome."
- * "Team Android."
- * "Waiting for IOS."
- * "It's the beta."

If you believe in the mission, then why not take a moment to create a wallet? I use Chrome solely for the wallet. Your wallet boosts GameStop's statistics and optimization of the product. [Here](https://www.reddit.com/r/Superstonk/comments/uxeah9/how_to_add_chrome_extensions_gamestop_wallet_on/) is how you can set it up on android. Yes, it's the beta, something gone awry? Let them know! They have done such a great job listening to us and implementing our feedback.

There are several NFT wrinkle apes creating FREE artwork just to share with everyone! Support your fellow apes! Effortlessly send them some loops through the revolutionary Layer 2 system. u/MrFerno still has a shit ton of [this cool piece](https://www.reddit.com/r/GME/comments/uycityf/4167542069_to_go_if_you_have_a_wallet_and_want_a/) left to distribute. And on top of that, every transaction between apes benefits GameStop! I don't understand the hesitation...

I do, however, understand it can be expensive to activate Layer 2. BUT, GameStop being the beautiful customer driven company it is, has implemented a system where a currently activated L2 account can pay the activation fees for a new user! I'm sure I'm not the only ape who would gladly send some loops and pay the minor activation fee for another ape... SO, if you need assistance, please feel free to comment or DM me your NEW L2 wallet address and I'll activate it so you can start collecting those sweet sweet NFTs! And if any other apes are willing to do the same, leave a comment! Apes together strong!
