6.6M XRT Shares Outstanding

33.72M Total XRT Shares Shorted (5x the float)

GME the #1 holding within the ETF.

Average for all other retail ETF's have roughly <1% short interest, while this specific ETF **has an SI% of 1,322.35%,** and rising.

Naysayers/hedgie defenders have said that this is due to T+2 settlements, but that doesn't pass the test of reasonable explanation. That would mean that this ETF is in a constant cycle (or recycling) of shorted shares 5x the float every two days (33.72M/6.6M).

T+35's have also been a wreck as this ETF has been on the threshold list for quite some time.

Any insight from the community is appreciated.
