

Title: As a nurse, we need to think about mitigating the loss of life from a severe economic depression. If GME moons, we can make a difference collectively.

Hi all. I'm an travel ICU nurse. No FUD.

I think it's safe to assume that we're headed toward an economic depression. I want this post to focus on the lives that will be lost.

Remember the shanty towns, remember the Hoovervilles of the Great Depression. Have you seen the homeless population growing in your area yet? I'm seeing it.

Remember the loss of life 6-12 months after the city of Paradise burned down. Displacement took more lives than the fires.

How many lives will be lost when the economy tanks?

What could a giant group of smooth brained apes with loads of money from GME do?
