I decided to brush off some of the ol' excel skills and crunched some numbers for shitadel and melvins AH losses.

Melvin had roughly \$18.7B before open, after trading and AH they lost ~\$695M, or a 3.72% loss

Shitadel had ~\$236B before open in their top 466 longs that I could access and work with. After trading and AH they had lost ~5.38B, or a 2.28% loss. Not including the other hundreds if not thousands of other stocks that tried to break my computer

The numbers were a rough job, but they're still probably close.

Hopefully yesterday's hedgie burn is hot enough to light gme to the moon■■■
