I know I know I'm not going to sell my precious gme stocks but let's say I want to live comfortably and travel all Uranus 27 moons ■■■■■■

So let's say I'm willing to sell just one gem stock or gad forbids maybe two, only whenever we reach the area of a telephone numbers prices. (Random telephone number 40-000-000)

And let's say another 1,000,000 apes would like to join the trip.

$40,000,000 * 1,000,000 = 40,000,000,000,000$

I think it's \$40 trillion

It's a pretty big number and I thinking to myself is there enough money in the stock market to pay us? and who will pay us if the short fuckers will go bankrupt.
