This is the craziest thing I've conjured us thus far, but please hear me out all the way. Apple in preparation for their event next week, have given out some Easter eggs.

1- For starters one Easter egg is virtual cards (no joke). They are speculated to be augmented reality Memoji cards.

2 - Also Apple has just filed a bunch of patents to get into the gaming realm to add controller devices to their current hardware and future upcoming hardware.

3 - GME has a strong partnership with Razor and Apple is *possibly(getting partnership with Razor. This is important because last year GME added a bunch of new Razor products to their online shop and in store.

4 - Apple just or is planning to buy out EA.

I can see a partnership here, especially since a famous quote from the notorious Warren Icahn said "The apple does not fall far from the tree" and has made other references on Apple.

PS Ryan Cohen is the largest individual shareholder of AAPL.

Oh also apple has a patent for VR goggles which may be integrated someone but my smooth brain hasn't seen the connection fully to report it to y'all.

Tits hurt from jacking!
