When the time comes to sell, is anyone familiar with how selling goes on Computershare? Can you just start a chat with them and have them sell shares for you, or is it easier to just do it through their website?

Also, for those of us that DRS'ed from fudality, if we sell our shares in CS, how do we get paid? Does CS start a cash account for us, or do they just send us a check in the mail?

Thanks boys. I'm sure this has been asked already.
